PIERRE FABRE FOUNDATION: 10 YEARS OF ACTION AGAINST SICKLE-CELL DISEASE

The fight against sickle-cell disease is one of the Pierre Fabre Foundation’s four areas of intervention. In 2006, the Foundation set up a consortium to build a reference center for combating the disease in the Global South. The Centre de Référence Interdisciplinaire sur la Cinétique et la Génétique de la Cellule Sérotylique (CRISS) in Ouagadougou, Burkina Faso, is one of the consortium’s nine active programs. The group also runs seven active programs in nine countries (Mali, Senegal, Togo, Democratic Republic of Congo, Angola, Cameroon, Congo-Brazzaville, Democratic Republic of Congo, Madagascar).

To date, and after 10 years of experience in combating this disease, the Foundation’s four areas of intervention. In 2006, the Foundation set up a consortium to build a reference center for combating the disease in the Global South. The Centre de Référence Interdisciplinaire sur la Cinétique et la Génétique de la Cellule Sérotylique (CRISS) in Ouagadougou, Burkina Faso, is one of the consortium’s nine active programs. The group also runs seven active programs in nine countries (Mali, Senegal, Togo, Democratic Republic of Congo, Angola, Cameroon, Congo-Brazzaville, Democratic Republic of Congo, Madagascar).

PIERRE FABRE ORAL CARE AND THE UNION FRANÇAISE POUR LA SANTÉ BUCCO-DENTAIRE ORGANIZE THE “SMILING SPRING”

Aware of the position of oral care at the heart of global health and the importance of helping all French people acquire proper daily oral care reflexes, Pierre Fabre Oral Care, a key player in pharmacy, and the Union Française pour la Santé Bucco- Dentaire have come up with a season dedicated to awareness, motivation and education with the “smiling spring”, a set of actions to adopt “Good Resolutions” for our oral care!

PIERRE FABRE PHARMACEUTICALS LAUNCHES FEELCAPS TO RAISE PATIENTS’ AWARENESS OF THE BENEFITS OF REGULAR PHYSICAL EXERCISE

Launch of a new digital health service named “FeelCaps” intended for chronic patients, which will be offered for free by their doctor. As a game, FeelCaps is an educational, adaptable and easy-to-use online platform, which will help patients to better understand the importance of regular exercise for their health. Patients will find it easier to get motivated for one or more APAs suited to their chronic pathology.

POSITIVE RESULTS OF THE PHASE 3 COLUMBUS STUDY IN MELANOMA

Pierre Fabre announced the first results of the pivotal phase 3 COLUMBUS trial with the treatment combining binimetinib (R纱) and vemurafenib (vem) in BRAF-mutant melanoma patients. The study has achieved its primary endpoint, with the binimetinib/vemurafenib combination significantly improving progression-free survival (PFS) compared with vemurafenib, a BRAF inhibitor, on its own. The bin/vem combination was well tolerated on the whole, and the reported adverse events were similar to previously published clinical trial results on the bin/vem combination in BRAF-mutant melanoma patients.

THE TOULOUSE CANCER HEALTH FOUNDATION AND THE PIERRE FABRE RESEARCH INSTITUTE CREATE A RESEARCH CHAIR IN IMMUNO-ONCOLOGY

The Pierre Fabre Research Institute and the Toulouse Cancer Health Foundation announced the joint creation of a research Chair dedicated to immun-o-oncology research. This Chair, with equal funding given for two years by the Toulouse Cancer Health Foundation and the Pierre Fabre Research Institute, will be led by Professor of Pathology at the Yale University Medical School, and the department dedicated to translational medicine and headed by Dr. Alexandre Passoulen with Pierre Fabre Pharmaceuticals R&D.

SIGNING OF THE 1ST PARTNERSHIP AGREEMENT WITH NATURE OPEN LIBRARY

In February 2016, Pierre Fabre Libra, created by Pierre Fabre, signed a partnership agreement to identify, in clinical trials, innovative, scalable and affordable solutions to address a major health issue. Pierre Fabre Libra is looking for open innovation projects in the field of rare diseases with a view to accelerate the development of new therapies.

OPEN INNOVATION: DAYONE!

The “DAY ONE” forum, organized jointly by the Pierre Fabre Research Institute and the Cancer-Bio-Health Competitiveness Cluster, brought together more than 350 innovators in oncology, dermatology and onco-dermatology at the Oncopole site in Toulouse. More than 30 start-ups from different cities in the Greater- Western region (Nantes, Bordeaux, Limoges, Toulouse, Montpellier) presented their projects in the form of pitches to an extremely varied public: funders of development teams, such as (INNERS, ENSIS, members of the Toulouse Cancer Research Center (CTC) and the Cancer University Institute of Toulouse (IUCT), as well as organizations seeking to fund innovative projects (Capitole Angels, BPI, and Pierre Fabre Fund for Innovation, among others).

LAUNCH OF A JOINT PROJECT IN TRANSLATIONAL MEDICINE

Pierre Fabre Pharmaceuticals announces the organisation of a research project in translational medicine on a drug candidate produced by its pharmaceutical research in oncology. A collaboration will be set up between Professor David Friend PhD-MD PhD, Professor of Pathology at the Yale University Medical School, and the department dedicated to translational medicine and headed by Dr. Alexandre Passoulen with Pierre Fabre Pharmaceuticals R&D.
Through the Botany for Change Award, launched in November 2015, Klorane Botanical Foundation called on students in botany, horticulture, architecture and landscaping to add plants to our lives by imagining “Tomorrow’s urban garden.” In May 2016, the four plant creations selected by the jury were revealed to the general public on the Parvis de l’Hôtel de Ville in Paris. For the 2017 event, on the “Botany and the 5 senses” theme, the award-winning plant creation will start to grow permanently in La Villette (Paris).

OCTOBER 2016
DERMOCONTROL®: A MOBILE APPLICATION TO LIVE MORE COMFORTABLY WITH ECZEMA

Eczema affects almost 1 in 38 adults in France and is the most prevalent skin disease. Although it “comes and goes,” it does not mean it is easy to live with. So how can “living with eczema” be improved? Our Ducray brand’s answer was to develop a mobile application: DERMOCONTROL® by DUCRAY.

This was developed in partnership with the Association Française de l’eczéma (the French eczema association), the Fondation pour la dermatite atopique (the Pierre Fabre Group foundation for atopic dermatitis) and the Réseau National de Surveillance Aérobiologique (R.N.S.A) (French national network of aerobiological monitoring).

MARCH 03, 2017
STRATEGIC PARTNERSHIP WITH THE AMERICAN LABORATORY HILL DERMACEUTICALS, INC. FOR THE MARKETING OF TOLAK®

Pierre Fabre Dermo-Cosmetics obtains an exclusive license for the sale of TOLAK® in the U.S. and Pierre Fabre Dermatologie for other countries where the marketing authorization has not yet been granted. This patented two of its subsidiaries: Pierre Fabre USA for immediate distribution of TOLAK® in the U.S. and Pierre Fabre Dermo-Cosmetics obtains an exclusive license for the sale of TOLAK® over a vast territory, via 700 partner associations in France.

In 1957, Mr. René Furterer launched his eponymous brand. His hair care products and rituals based on unique expertise, with original and ground-breaking techniques, immediately made the brand a model for beautiful hair and exquisite hair care products. As the brand celebrates its 60-years of delicious hair,” René Furterer is reaffirming its founding values of expertise, naturalness, sensoriality, and exclusivity. The same values that established it as a benchmark in hair care.

OCTOBER 2016
KLORANE LABORATORIES PARTNERS OF THE AGENCE DU DON EN NATURE

In accordance with their CSR policy, the Klorane Laboratories donated 35,000 baby products as part of their partnership with the Agence du don en nature (ADN, Donations in Kind Agency). These products were distributed via a network of 700 partner associations in France.

SEPTEMBER 2016
CONTINUOUS INTERNATIONAL EXPANSION IN ASIA WITH THE OPENING OF TWO SUBSIDIARIES, IN JAPAN FOR RENÉ FURTERER AND IN HONG KONG.

SEPTEMBER 2016
OPENING OF THE NEW HOTEL IN THE AVÈNE HYDROTHERAPY CENTER

Pierre Fabre Dermo-Cosmetics (PFDC), has opened a hotel of international standing on the Avène-les-Bains Hydrotherapy Center site (Vaucluse, France). The center is specialized in dermatology and its public utility has been recognized for 343 years. This new hotel was designed by the architect Régis Taillibert.

“UN ULIVO PER LA VITA”

For the first time, on Saturday July 2, 2016, the Foundation for Atopic Dermatitis organized a “Sportsday” event combining sports and eczema on the INSEP site in Paris. This event, organized for the benefit of children suffering from atopic dermatitis, had two objectives: to receive advice adapted to each sport so as to be able to best play it without being concerned about skin damage; to discover sports never played before.
